SMART EDITION

DESIGN
ITALIANO

CLASS

Class. By delving into the past to contemplate the future, this line was born with a decidedly classic feel, featuring a delicate touch of industrial chic.

ESSENZA

Essenza. A kitchen for anyone who loves cooking. Essenza is perfect for a space that needs to be beautiful, but also very practical.

ROMANTICA

Romantica. It offers a sophisticated classical look that still meets modern functional and technological needs. It marks the borderline between the traditional and the contemporary, with an elegant, restrained neoclassical style.

LINEA GLAM

Linea Glam. Contemporary and eclectic, here is a kitchen that knows how to interpret with elegance and functionality the most diverse architectures.

CUBE

Cube. The elements of the composition are interpreted as primary volumes, combined with flair using differentiated depths and materials, thus breaking with more traditional schemes.

KARL

Karl. A sofa designed after consistently perfectly matching style and comfort: the balance between shape and matters stands out. Rich in functional solutions, as the double density upholstered seat.

GOLF

Golf. Bookshelves, modular systems and equipped walls are all perfectly integrated, designing spaces that respond to the needs of contemporary living.

CHETO

Cheto. Concentrating on two main elements, the seat depth and the backrest bending, a naturally comfortable sofa was designed, an upholstered unit inviting to rest even while standing out for its design as well.

PEGASO

Pegaso. A play between lines and volumes is the defining mark of Pegaso, a model that proposes interesting combinations, using drawer inserts with a side handle grip. The elements are available in a melamine faced and matt lacquered ash wood finish.

AQUAMARINE

Aquamarine. From bedroom to personal space where you study, sleep and keep your stuff, designed for your personality.

VENERE

Venere. A furniture item can be much more and become the main feature of the room thanks to its design: That's Venere. It plays on the three-dimensionality and the effect of the shadows created by the cantilever drawers, to highlight the value of a design that is anything but trivial.

CASTLE

Castle. A bunk bed that in a small space is able to put three functions of the bedroom together: storage, study and relax.

Let your home
become the best part
of you.
